Interim Management Report of Fund Performance For the Six-Month Period Ended September 30, 2024

This Interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You may obtain a copy of the interim financial report or annual financial statements, at no cost, by contacting us using one of the methods noted under Fund Formation and Series Information or by visiting the SEDAR+ website at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure. For more information, please refer to the Fund's Simplified Prospectus and Fund Facts, which may also be obtained, at no cost, using any of the methods outlined above.

For the Fund's current net asset values per security and for more recent information on general market events, please visit our website.

#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of Mackenzie to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

## Management Discussion of Fund Performance

November 12, 2024

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the six-month period ended September 30, 2024 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "Mackenzie" and "the Manager" refer to Mackenzie Financial Corporation, the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read A Note on Forward-Looking Statements on the first page of this document.

Investors holding securities of Mackenzie Global Resource Class were merged into the corresponding series of the Fund on a tax-deferred basis on July 30, 2021. Consequently the information in this report is presented as if the Fund had existed since the inception of Mackenzie Global Resource Class.

The Fund is closed to new sales.

## **Results of Operations**

### **Investment Performance**

The performance of all series in the current and previous periods is shown in the *Past Performance* section of the report. Performance will vary by series primarily because fees and expenses differ between series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Fund Formation and Series Information* section of this report for the varying management and administration fees payable by each series. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

During the period, the Fund's Series A securities returned 3.6% (after deducting fees and expenses paid by the series). This compares with a return of 9.0% for the Fund's broad-based index, the MSCI World (Net) Index, and a return of 0.9% for a blended index composed of a 55% weighting in the MSCI World Energy (Net) Index (returned -3.8%) and a 45% weighting in the MSCI World Materials (Net) Index (returned 6.6%). All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in the index returns.

Global equity markets generally rose over the period as most central banks began to cut interest rates. Share prices increased in relation to corporate earnings, with gains in U.S. markets driven mainly by a small number of mega-capitalization stocks. The global economy was resilient as inflation continued to slow across most major markets, although unemployment moved slightly higher.

Crude oil prices reached the range of US\$85 to US\$90 per barrel earlier in the period before falling below US\$70. Concerns about global economic growth, particularly the Chinese economy, weighed on prices, and energy equities declined from April highs. However, the Organization of the Petroleum Exporting Countries and other oil-producing nations extended voluntary production cuts to maintain supply discipline. Meanwhile, natural gas prices were volatile. Gold prices climbed to record highs in response to central bank bullion purchases and expectations of lower interest rates.

Within the MSCI World Energy (Net) Index, Portugal, Canada and Japan were the best-performing markets in Canadian dollar terms, while Finland, Spain and Australia were the weakest. The oil, gas and consumable fuels industry outperformed the energy equipment and services industry. Within the MSCI World Materials (Net) Index, Denmark, Canada and Switzerland were the strongest-performing markets in Canadian dollar terms, while Israel, Belgium and Austria were the weakest. The containers and packaging industry and the metals and mining industry were the strongest performers, while construction materials and paper and forest products were the weakest.

The Fund underperformed the broad-based index because of its focus on the energy and materials sectors, which underperformed broader global markets in the period. Given the Fund's mandate, the return of the blended index is a more meaningful comparison.

The Fund outperformed the blended index, with overweight exposure to Canada and stock selection in the United States contributing to performance. In industry terms, stock selection in metals and mining and in oil, gas and consumable fuels contributed to performance.

Conversely, underweight exposure to Switzerland and stock selection in Australia detracted from performance relative to the blended index. In industry terms, an underweight position and stock selection in chemicals, as well as stock selection in paper and forest products, detracted from performance.

The Fund held call options on the price of gold, which is an efficient way to gain exposure to the commodity. These options contributed to performance as gold prices rose.

Over the period, the Fund's exposure to the metals and mining industry increased, and exposure to the oil, gas and consumable fuels industry decreased, as a result of market movements.

### **Net Assets**

The Fund's net assets decreased by 4.5% during the period to \$23.8 million. This change was composed primarily of \$0.9 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and a decrease of \$2.1 million due to net securityholder activity (including sales, redemptions and cash distributions).

### **Fees and Expenses**

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2024, was generally similar to the MER for the year ended March 31, 2024. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

### **Recent Developments**

The portfolio management team expects the demand for natural gas to accelerate once export liquefied natural gas terminals are completed in the next 12 months, as burning natural gas generates fewer carbon emissions than other fossil fuels.

In the team's opinion, the next decade will be about infrastructure rebuilding, onshoring production and the material-intensive clean energy transition. This shift should allow commodity prices to stabilize at higher levels than expected by current market consensus. The team believes higher prices may increase equity valuations and enable company executives to redeploy capital into their businesses. The team focuses on companies with strong, sustainable free cash flows while maintaining disciplined sub-sector allocations in the Fund, based on macroeconomic indicators and managed risk exposures.

The following changes to the Mackenzie Funds' Independent Review Committee occurred:

- effective September 13, 2023, Saijal Patel was appointed;
- effective March 5, 2024, Atul Tiwari resigned; and
- effective April 30, 2024, the terms for Robert Hines and George Hucal expired, and Rebecca Cowdery was appointed.

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2024

### **Related Party Transactions**

#### Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to the Manager at the annual rates specified under *Fund Formation and Series Information* in this report and as more fully described in the Prospectus. In return for the administration fees, the Manager pays all costs and expenses (other than certain specified fund costs) required to operate the Fund that are not included in management fees. See also *Management Fees*.

#### **Other Related Party Transactions**

The Fund did not rely on an approval, positive recommendation or standing instruction from the Mackenzie Funds' Independent Review Committee with respect to any related party transactions in the period.

## Past Performance

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional securities of the Fund. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

The past performance before July 30, 2021, is based on the performance of the applicable series of Mackenzie Global Resource Class, which was merged into the corresponding series of the Fund on that date.

### Year-by-Year Returns

The following bar charts present the performance of each series of the Fund for each of the fiscal periods shown. The charts show, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

The Fund held no direct short positions at the end of the period.

For the prospectus and other information about the underlying fund(s) held in the portfolio, visit www.mackenzieinvestments.com or www.sedarplus.ca.

62.2

The investments and percentages may have changed since September 30, 2024, due to the ongoing portfolio transactions of the Fund. Quarterly updates of holdings are available within 60 days of the end of each quarter except for March 31, the Fund's fiscal year-end, when they are available within 90 days.

# **Financial Highlights**

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for each of the fiscal periods presented below. If during the period a fund or series was established or reinstated, "period" represents the period from inception or reinstatement to the end of that fiscal period. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

The financial information before July 30, 2021, is based on the performance of the applicable series of Mackenzie Global Resource Class, which was merged into the corresponding series of the Fund on that date.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash/reinvested in additional securities of the Fund, or both.

(1) This information is provided as at the end of the fiscal period shown.

- (2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.
- (4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

## **Management Fees**

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for the costs of managing the investment portfolio of the Fund and/or the underlying fund(s), as applicable, including providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sale of the investment portfolio, and providing other services. The Manager also used the management fees to fund sales commissions, trailing commissions and any other compensation (collectively "distribution-related payments") to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with the Manager may be entitled to distributionrelated payments from the Manager on the same basis as unrelated registered brokers and dealers: Investors Group Securities Inc. and Investors Group Financial Services Inc.

The Manager used approximately 42% of the total management fee revenues received from all Mackenzie funds during the period to fund distribution-related payments to registered dealers and brokers. In comparison, such distribution-related payments for the Fund represented on average 43% of the management fees paid by all applicable series of the Fund during the period. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions and sales commissions paid for that series. The higher proportion of distribution-related payments is primarily attributable to sales commissions related to gross sales of redemption charge securities of the Fund.

#### INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | For the Period Ended September 30, 2024

## **Fund Formation and Series Information**

The Fund may have undergone a number of changes, such as a reorganization or a change in manager, mandate or name. A history of the major changes affecting the Fund in the last 10 years can be found in the Fund's Simplified Prospectus.
